Monday - Friday : 5pm - 8pm

Saturday/Sunday: 9am - 12pm

Location

107 Liverpool Road , Birkdale.
PR8 4DB

More about 7-Day GP Service for Southport and Formby

The 7-Day GP Service provides additional GP Surgery appointments over and above those that your own surgery provides. The service offers appointments for routine health conditions, which are booked in advance. It is not a walk-in or urgent care service.

Although the service is based at the Family Surgery in Birkdale, it is run entirely independently of that GP Practice by Southport & Formby Health. We chose that location because it is central and easily accessible from anywhere in Southport and Formby.

Who can use the 7-Day GP Service?

Anyone who is registered with a GP surgery in Southport and Formby can book a routine appointment. The service is available for patients who find it difficult to get to their own surgery during core hours

What kind of appointments are available?

You can book the same types of appointments as you do in your own GP Surgery: GP, nurse practitioner, practice nurse and health care assistant appointments are available. The service also has a physiotherapist to offer advice on new-onset muscular conditions and joint problems that you may be experiencing.

How do I book an appointment at the Service?

You can book an appointment by ringing your own GP surgery. Your surgery receptionist will be able to guide you through the range of appointments available.

Will the clinician be able to access my medical record?

The clinician will need to look at your medical record during the consultation to provide you with safe, high-quality care. When you make an appointment, you will be asked to give consent for your record to be shared during the appointment. We cannot provide an appointment without your consent.

A record of the consultation will be available in your own surgery, so that your own GP will be able to see details of the consultation.

Can I be referred to another service?

Clinicians will be able to refer you for diagnostic tests, and hospital and community services if required.
